How to read this report

Ranks are based on the seasonal average or sum from 1889 to present day. A value of 1 indicates the highest rank, while a rank of 137 indicates the lowest rank. Anomalies are calculated relative to a 1941-1970 average (baseline). Rainfall totals are based on daily totals which are summed over the entire season and averaged over the area of the particular region being analysed. To see more information on our methods, refer to our methodology document.
